

Norman Noble Adds Nitinol Tubing Inventory List to Website *Available for Customer Rapid Prototype Orders*

HIGHLAND HEIGHTS, OHIO – February 1, 2024 – Norman Noble, Inc., the world’s leading contract manufacturer of next-generation medical implants, has added an in-stock nitinol tubing list to their website. The nitinol tubing inventory is available with zero lead time to manufacture medical implant prototypes for customers.

“Norman Noble has purchased many sizes of nitinol tubing over the years and our customers have asked to provide them a list of our excess inventory,” said Brian Hrouda, Norman Noble’s Director of Global Sales and Marketing. “Publishing our nitinol tube inventory enables our customers with next-gen vascular implant designs to review tube options available for Norman Noble to start machining their rapid prototypes immediately.”

In addition to the tubing listed online, Norman Noble will continue to procure nitinol tubing from their qualified suppliers, as required, to support customer orders for new rapid prototype projects. The nitinol tubing listed online is limited and exclusively reserved for rapid prototypes for Norman Noble customers. To view the nitinol tube inventory list, visit www.nnoble.com/nitinol-tubing-stock.

About Norman Noble, Inc.

Established over 75 years ago, Norman Noble, Inc. remains a family-owned and -operated company offering the most advanced processes for ultra-precision micromachining of medical implants. The company is known for its exceptional ability to produce nitinol-based implants and to achieve sub-miniature precision beyond the reach of most manufacturers. Norman Noble, Inc. is a supplier to most of the largest OEMs and well-known names in the medical device industry.

Norman Noble manufactures medical devices and implants to customer specifications in compliance with FDA regulations and ISO 13485. State-of-the-art processes include athermal laser machining, laser welding, Swiss turning and milling, conventional and wire EDM, high-speed 7-axis contour milling, electropolishing, nitinol shape setting, and clean room assembly and packaging. Rapid development prototyping services are available in separate and fully dedicated process development centers. FDA Registration #1531050. Virtual tour and more information: www.nnoble.com.
