

Norman Noble Increases Inventory of Nitinol Tube for Customer Prototypes

Broader Range of Sizes Reduces Lead Time to Manufacture Medical Implant Prototypes

HIGHLAND HEIGHTS, OHIO – April 14, 2025 – Norman Noble, Inc., a leader in ultra-precision micromachining for the medical device and implant industry, has increased availability of nitinol tube sizes to better support customers in early-stage product development. This enhancement helps medical device OEMs accelerate prototype production and reduce development timelines.

The expanded inventory includes a wider range of outer and inner diameters, wall thicknesses, and lengths, all in stock and ready for immediate use in rapid prototype manufacturing. By offering greater flexibility in nitinol tubing specifications, Norman Noble is enabling engineers to obtain initial round prototype parts faster.

This investment in materials availability reflects Norman Noble's ongoing commitment to being a strategic development partner for medical device OEMs. Having a large variety of tubing available enables Norman Noble to start projects immediately and manufacture rapid prototype parts within a few days. By streamlining the prototyping phase, the company helps customers bring innovative, life-enhancing technologies to market faster.

In addition to the nitinol tubing listed online, Norman Noble continues to procure nitinol from their qualified suppliers, as required, to support customer orders for new rapid prototype projects. The nitinol tubing listed online is limited and exclusively reserved for rapid prototypes for Norman Noble customers. To view the nitinol tubing inventory list, visit www.nnoble.com/nitinol-tubing-stock.

About Norman Noble, Inc.

Established over 75 years ago, Norman Noble, Inc. remains a family-owned and -operated company offering the most advanced processes for ultra-precision micromachining of medical implants. The company is known for its exceptional ability to produce nitinol-based implants and to achieve sub-miniature precision beyond the reach of most manufacturers. Norman Noble, Inc. is a supplier to most of the largest OEMs and well-known names in the medical device industry.

Norman Noble manufactures medical devices and implants to customer specifications in compliance with FDA regulations and ISO 13485. State-of-the-art processes include athermal laser machining, laser welding, Swiss turning and milling, conventional and wire EDM, high-speed 7-axis contour milling, electropolishing, nitinol shape setting, and clean room assembly and packaging. Rapid development prototyping services are available in separate and fully dedicated process development centers. FDA Registration #1531050. Virtual tour and more information: www.nnoble.com.
